PREMIUM PRODUCTS FOR CORPORATE SALES

With full-service embellishment and customer service, we are pleased to present you with world-class products for your clients, colleagues, or employees through this special program.

Please enjoy the following product offering, and contact the Helly Hansen Customer Service Department at 800-435-5901 for help in identifying the best product options for your team or event.

ALIVE
SINCE / 1877

INNOVATION SINCE 1877

From our home in Norway, Helly Hansen has been making professional grade gear that helps people stay and feel alive for the last 140 years.

In 1877, after many years at sea, Norwegian captain Helly Juell Hansen and his wife, Maren Margarethe, began producing oilskin jackets, trousers, sou'westers and tarpaulins, made from coarse linen soaked in linseed oil.

Since then, the legacy of Helly Hansen lives on, developing and creating a long list of first-to-market innovations.

To this day, we continue to make gear that is trusted by professionals around the world. Helly Hansen apparel is developed through the insights of the 55,000 professionals living and working in the world's harshest environments and can be seen on ski patrollers, mountain professionals, world-class sailors, skiers and adventurers.

Helly J. Hansen's
MOSS

HELOX - THE NEXT EVOLUTION IN WATERPROOF

Helox waterproof fabric featured a thin sheet of translucent PVC plastic that was sewn into coats to make them waterproof. It was a revolutionary technology that became the must-have protection for outdoor use. With a

production of 30,000 coats each month, the success was almost immediate and was used by the Norwegian delegation at the 1952 Olympic Games in Helsinki.

1949

FIBERPILE - THE TECHNICAL MIDLAYER IS INVENTED

Helly Hansen partnered with Norwegian Fiber Pile Inc. and developed the original Fiberpile – the first fleece. It featured a high warmth to weight ration and maintained its thermal qualities even when wet,

making it a favorite of lumberjacks and outdoor enthusiasts. The concept lives on and the modern version of ProPile is still in production today.

1961

1970

LIFA® – THE BIRTH OF TECHNICAL BASE LAYER

HH's LIFA® revolutionized the industry with the introduction of the first technical base layers. LIFA® moves moisture away from the body allowing users to stay warm and comfortable. It has been used by professionals on every ocean, many of the world's

tallest peaks and was included in Outside Magazine's list of The Most Influential Gear of All Time in 2012. LIFA® remains the cornerstone of what we believe is the best technical base layer available today.

1984

HELLY TECH® - THE WATERPROOF AND BREATHABLE SOLUTION

Helly Tech® waterproof and breathable fabric was launched in the 1980's, winning awards and setting the new standard for performance and protection. It also provided the final layer for the 1986 introduction of the Helly Hansen

3-Layer System™, an industry-first program educating people on how to dress for the outdoors. Today, Helly Tech® fabrics are engineered to deliver the specific demands of professional's skiers, sailors, and at workplaces around the world.

1990

PROWOOL - THE PERFECT BLEND OF LIFA® AND MERINO

The Prowool (renamed HH® Lifa Merino) baselayer for cold weather conditions was launched in the late 90's, combining Lifa® Stay Warm Technology™ with Merino wool for both moisture transport and added warmth. Designed for professionals facing

the coldest conditions it quickly became the go-to piece for performance, warmth and comfort in extreme environments.

2012

H²FLOW™ - A BETTER SOLUTION FOR TEMPERATURE REGULATION

Helly Hansen introduced the new H2Flow™ Technology in 2012 with the H2Flow™ Jacket, which won an Award for Design Excellence from the Norwegian Design Council. The patented H2Flow™ Jacket features an airflow

venting system and a protective barrier. It allows adventurers to efficiently regulate their body temperature.

2018

LIFA® MAX - OUR WARMEST BASE LAYER IN COLD CONDITIONS

Helly Hansen introduces its warmest base layer to date by thickening the already tried and tested Lifa® fibers to produce a warmer, lightweight and flexible garment. The enhanced, unrivaled

warmth and comfort is why we believe Lifa® Max is the best technical base layer available today.

SIZE GUIDE

HH WARRANTY

- HH will warrant all Uniform products against manufacturer's defects.
- The HH warranty does not cover damage caused by misuse, improper care, normal wear and tear and the natural breakdown of materials over time. Ripped, torn, cut, burned, stained or abused products will not be covered under the HH warranty.
- HH also limits the warranty on stretch fabrics to 2 years for abrasion. Due to the current Global limitations on access to Perfluorinated compound (PFC) Durable Water Resistant (DWR) coatings, HH cannot warrant surface water saturation without the regular and documented in-season and post season, technical washing and re-application of DWR by reputable brands such as Nikwax.
- All warranty claims will be subject to HH approval.

WORKWEAR SIZE CHART

* Please note changes to the size charts below.

EN 340:2004

Protective clothing - General requirements

Helly Hansen protective clothing is designed and manufactured in such a way that it does not have any effect on the user's health or hygiene.

The design guarantees a correct fit and protection for the body when used correctly.

The design and material offer function and comfort. The material offers good fade-resistance, stability, strength and durability, to ensure that the garments have a long life, even with heavy use and many washes.

Size grading is based on body measurements in centimeter, see the size guide.

All garments are properly marked on garment labels and on external labels to indicate the information required for the standard.

Check your body measurements as instructed and compare with the data in the table.

Example: If your chest measures 44 inches you should wear size XL.

Chest: With arms relaxed at sides, measure around fullest part of chest.

Waist: Measure around natural waistline, smallest part of waist.

Hips: Standing with legs together, measure around fullest part of hips.

Inside leg: Measure inside length of your leg from crotch to bottom of ankle.

MEN'S

Garment size		XS	S	M	L	XL	2XL	3XL	4XL	5XL	6XL
